

# Multidisciplinary Team

A multidisciplinary team is a group of Allied Health professionals from different disciplines working together to support a child or young person to achieve their therapy goals.

## Your support team

At NeuroJunior Allied Health, your multidisciplinary team may include:

- Physiotherapist
- Occupational Therapist
- Speech Pathologist
- Exercise Physiologist
- Music Therapist
- Neuropsychologist or Psychologist
- Behaviour Support Practitioner
- Dietitian
- Allied Health Assistant

## Multidisciplinary teams offer best care

- ✓ A single point of communication to make your life simpler.
- ✓ Therapists share important information to keep you from having to retell your story over and over.
- ✓ Therapists work collaboratively to tackle your goals using multiple approaches and skills.
- ✓ Therapists use consistent language and share knowledge and resources for a coordinated approach.
- ✓ Super sessions available, with multiple therapists treating at the same time.
- ✓ Care team meetings are easy to arrange when all team members are known to each other.
- ✓ Coming to the clinic? Minimise your travel by booking appointments on the same day.
- ✓ Referring to another discipline is easy – no need to fill out more forms!
